UNIVERSITY OF PENNSYLVANIA
COLLEGE BIOCHEMISTRY PROGRAM

Research Participation Responsibilities

Student Name: _______________________________________ e-mail:_____________________

Research Group PI: _______________________________________ e-mail:_____________________

Laboratory Supervisor: _________________________________ e-mail:_____________________

Lab location (building, room number(s)):______________________________________________

Year__________Fall_____Spring_____Summer_____

BCHE 404_____299____300_____

Working in a faculty led research group requires academic integrity, and candor that goes beyond the expectations associated with classroom based course work. Accidental or honest mistakes in the laboratory must be immediately disclosed to coworkers or the Principal Investigator. If not, valuable supplies or coworker time can be lost, expensive instrumentation can be broken, or laboratory animals can be wasted.

You are expected to participate in any and all safety, ethics and academic integrity information and training meetings required of graduate students as instructed by your research group PI.

Have you ever been found responsible for violation of academic integrity that resulted in probation, dismissal or suspension from any college or university?

Yes _____ No ______ Initial____

Have you ever been placed on probation, dismissed or suspended from any college or university (including other professional schools) for scholastic or other reasons?

Yes _____ No ______ Initial____

If the answer is yes to either question, see the Chair of the Biochemistry major. Your research participation in a faculty research group may be limited or denied. If at any time any of your actions do not meet the Program’s standards for responsibility and integrity, your eligibility for honors in the major and submatriculation will be curtailed.

..........................................................................................................................................

I give permission to the Deans at Penn to inform the Chair of the Biochemistry Program of any and all Office of Student Conduct actions involving me. (Answer and initial the two questions above, please.)
