Richard W. Berman

University of Pennsylvania

Green Design across Disciplines

Green design lies at the nexus of several overlapping fields: architecture, city planning, landscape architecture, historic preservation, and product design among them.

This talk will look at where sustainability overlaps these fields, and how it can be used to rethink the motives behind them.

The discussion will draw from two courses taught by Dr. Berman on the subject, which focus on concepts of sustainable design at a variety of scales.

Date: February 1, 2006

Time: NOON - 1:30 pm

Place: Carolyn Hoff Lynch Auditorium

On the Penn campus: Chemistry Building: 34 & Spruce Sts. (enter on 34 St)

NO REGISTRATION REQUIRED

Direct questions to: 215-573-3164
