Present

Dr. John Burland, FRS

Imperial College, London

In recognition of the new Master of Science in Applied Geoscience Program in the Department of Earth and Environmental Science, Dr. John Burland, visiting from Imperial College, London, will present a keynote lecture.

The Enigma of the Leaning Tower of Pisa

Dr. John Burland, FRS, Imperial College, London, involved in the recent successful efforts to stabilize the Leaning Tower of Pisa, offers this talk, which begins with a brief history of the construction and subsequent strange movements of this world renowned architectural wonder. Understanding the movements provides the key to developing a method of saving the Tower. Dr. Burland will share some of the challenges, frustrations and more worrying moments of participating in such a high profile project.
