Linking Land Use and Transportation Planning

Over the last decade, transportation and land use planners in the United States have been working hard to close the gap between these two closely related planning activities of government. Through this presentation, PENNDOT describes a wide range of tools to link land use and transportation in the planning and project development phases. The tools described include traditional planning tools enabled by the PA Municipalities Planning Code (Act 247) as well as some innovative ideas for consideration. In addition to the tools, the presentation includes many practical project examples throughout Pennsylvania where land use and transportation has been successfully coordinated.

Date: February 4, 2004
Time: NOON - 1:30 pm
Place: Carolyn Hoff Lynch Auditorium
On Penn's campus: Chemistry Building:
34th & Spruce St (enter on 34th St)

NO REGISTRATION REQUIRED
