PPE -101 NATURE OF REASONING  
MWF 3-4PM  SILLARI G  

The Course explores inductive and deductive reasoning principles, as well as the common biases and mistakes that mar individual reasoning processes. The course will also explore practical reasoning -- i.e. decision-making -- both from normative and descriptive viewpoints. 

PPE -110 INTRO TO DECISION THEORY  
FORMAL REASONING COURSE - ALL CLASSES  
GEN REQ IV: FRML REAS - CL OF 09 & PRIOR  
LEC TR 4:30-6PM  SEN S  

The course will provide an introduction to models of human decision making. One of the primary purposes of the course is to provide a set of basic tools that will help the student translate qualitative uncertainty into numbers. A substantial amount of the course will deal with the theory of rational choice in the presence of objective and subjective uncertainty. Rational choice under uncertainty is by far the most used theory of decision making, and its applications are widespread in economics, finance, political science, law, managerial decision making, the economics of health care, and artificial intelligence.

This course explores business responsibility from rival theoretical and managerial perspectives. Its focus includes theories of ethics and their application to case studies in business. Topics include moral issues in advertising and sales; hiring and promotion; financial management; corporate pollution; product safety; and decision-making across borders and cultures.

PPE -270  CONSTITUTIONAL LAW  
LEC MW 11-12NOON   SMITH R  
CROSS LISTED: PSCI-271

This course explores the role of the U.S. Supreme Court in political struggles over the distribution and uses of power in the US constitutional system. Issues include the division of powers between the state and national governments, and the branches of the federal government; economic powers of private actors and governmental regulators; the authority of government to enforce or transform racial and gender hierarchies; and the powers of individuals to make basic choices, such as a woman's power to have an abortion. We will pay special attention to how the tasks of justifying the Supreme Court's own power, and constitutionalism more broadly, contribute to logically debatable but politically powerful constitutional arguments. Readings include Supreme Court decisions and background materials on their historical and political context.

Economic theory has invaded legal scholarship and law schools, in the form of "Law and Economics". But the psychology of judgments and decisions has invaded economic theory, showing that people do not follow the classic model of economic rationality. Many legal scholars, such as Cass Sunstein, claim to have started a new field called "Behavioral Law and Economics", which explores the implications of psychology for legal theory. This seminar will review basic readings in law and economics and then the recent literature on the relevance of psychology. Topics include risk regulation, liability, and regulation of political behavior.

PPE -475  EQUALITY AND DISTRIB JUSTICE  
TR 1:30-3PM  PERRY S  
PERMISSION NEEDED FROM INSTRUCTOR

Our central concern in this course will be with the concept of equality as it figures in modern theories of distributive justice. We will also be considering the question of whether or not there is, as has sometimes been claimed, an unavoidable tension between the ideals of equality and liberty. We will begin with an overview of John Rawls’ landmark theory of justice. We will then consider the various normative and conceptual forms that egalitarianism can assume, taking as our point of departure work by Derek Parfit, Amartya Sen, and Ronald Dworkin. Next we will read an excerpt from Robert Nozick's Anarchy State and Utopia, which sets out the libertarian challenge to equality: Egalitarian and other patterned theories of distributive justice are, according to Nozick, incompatible with individual liberty. We will examine the so-called “luck-egalitarian” response to Nozick, focusing in particular on work by Dworkin and G.A. Cohen, and we will also consider critiques of luck-egalitarianism that have been advanced by Elizabeth Anderson and Samuel Scheffler. Finally, we will read excerpts from Cohen's book Self-Ownership, Freedom and Equality, in which Cohen offers an internal critique of Nozick's libertarian challenge.
