SAINTS IN THE BOARD OF HEALTH

It is Officious From a Venerable CostSELL and Old Methods.

So says Dr. Henry Leffmann in an interesting interview.

A Revival of Some of the Antique and Bizarre which has taken place in the beginning of the Century.

The Committee on Public Health has recently examined some of the antique and bizarre which has taken place in the beginning of the Century.

The present condition of the public health is such that it requires the most careful attention. The present condition of the public health is such that it requires the most careful attention.

The health of the people, as a whole, is in a very unsatisfactory state. This is due in large part to the neglect of the Board of Health.

The Board of Health, as usual, has been vacillating between the extremes of over-zealousness and neglect.

The autumn season is rapidly approaching, and the Board of Health should take immediate steps to prevent the spread of disease.
