

1 Reading

In *A T_EXas Style Introduction to Proofs*, read the introduction and Sections 6.1 and 6.2.

2 Response

Answers to these should be written down and turned in in class.

1. What are some examples and non-examples of finite sets? Are there any examples you're unsure or which seem ambiguous?

3 Exercises

You should bring solutions to these to class and be prepared to present them.

1. Statement 6.5

4 Homework Problems

Due Thursday, April 16th

1. Statement 6.8
2. Statement 6.10
